PROFESSIONAL SUMMARY

Dedicated Frontend-focused Software Engineer with a strong foundation in React.js, JavaScript (ES6+), and modern web technologies. Proven track record of building scalable real-time applications and high-performance user interfaces. Highly proficient in Data Structures and Algorithms with a Knight rating on LeetCode. Passionate about writing clean, maintainable code and optimizing web performance to deliver exceptional user experiences.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, HTML5, CSS3, Python, C

Frameworks/Libraries: React.js, Node.js, Tailwind CSS, Express.js, Redux, Socket.IO

Developer Tools: Git, GitHub, Postman, VS Code, Google Colab, Redis

Databases: MongoDB, PostgreSQL

Specializations: Responsive Design, RESTful APIs, Performance Optimization, Real-time Systems

EXPERIENCE & LEADERSHIP

Technical Head

2025 – 2026

Aaroha

- Leading a development team of 6+ to engineer and maintain high-traffic web and mobile platforms, focusing on cross-platform stability and load efficiency.
- Spearheading code reviews and implementing best practices for frontend architecture and modular component design.
- Recognized as Star Technical Volunteer of the Month for driving significant improvements in the core tech infrastructure.

Web Developer

2024 – 2026

FiNIT

- Enhanced UI responsiveness and performance across internal projects by integrating real-time feedback loops and modern CSS frameworks.
- Collaborated with design teams to translate wireframes into high-quality, reusable React components, ensuring brand consistency.

SELECTED PROJECTS

Resolve-AI (Real-time Support Platform)

MERN, Redis, Socket.IO, Gemini API

- Developed a full-stack automated support system utilizing React and Socket.IO for instant, real-time bidirectional communication between users and AI/Human agents.
- Reduced data retrieval latency and improved application responsiveness by implementing a Redis caching layer for session management and context-aware queries.

- Designed a seamless frontend escalation workflow that transitions users from AI chat to human support without state loss.

FreshScan - Computer Vision Web App

React, FastAPI, TensorFlow, Python

- Built a high-performance web interface for real-time fruit quality detection, achieving 96% accuracy in deep learning model inference.
- Optimized frontend image preprocessing using Canvas APIs to ensure consistent normalization before sending data to the FastAPI backend.
- Integrated RESTful endpoints for asynchronous image processing, providing users with sub-second feedback.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

LeetCode: Max Rating 1973 (Knight)

CodeChef: Max Rating 1663 (3 Star)

CodeForces: Max Rating 1431 (Specialist)

CyberShield Hackathon 2025: National First Runner-up

CodeSprint: Ranked 146 / 5000 participants

Problem Solving: 2000+ problems solved across platforms

EDUCATION

Maulana Azad National Institute of Technology (MANIT), Bhopal

B.Tech in Electronics and Communication Engineering

2023 – Present

CGPA: 8.17

Vivekananda Vidyapeeth, Bhopal (12th Standard - MP Board)

Major in PCM

2023

Percentage: 92.8%
